Criado em: 2025-11-01T15:59:06Z

Fechado em: 2025-11-04T06:13:07Z

Comentários: > [!NOTE] > This issue/comment/review was translated by Claude. >

`recordCurrentVersion` only checks for changes in the `version` field, so other metadata changes won't be recorded even if they occur. I'm not sure how data refactoring will depend on this information, but this is worth noting. > > As planned, users must first upgrade to a specific 1.7.X version before installing 2.0.0. > > We don't support upgrading from any version to 2.0.0, nor do we suppo...

PR #10862: feat: allow new-topic bindkey to create new session for agent as well

Autor: lenohard

Criado em: 2025-10-21T08:47:07Z

Fechado em: 2025-10-28T14:59:45Z

Comentários: This pull request adds a new keyboard shortcut to create a new session when
viewing sessions, and wires up an event-driven mechanism to handle session creation. The
changes ensure that the shortcut is only active in the appropriate context and that session creation
logic is centralized and reusable. **Keyboard shortcut and event-driven session creation:** * Added
a new shortcut handler in `Chat.tsx` that emits an `ADD_NEW_SESSION` event when the user is
viewing sessions and the shortcut is...

PR #10769: fix: update session model when changing agent model in top navbar

Autor: defi-failure

Criado em: 2025-10-16T08:29:46Z

Fechado em: 2025-10-17T04:42:16Z

Comentários: ## Code Review for PR #10769 ### Summary This PR fixes issue #10764 where changing the model via the top navbar wasn't updating the active session's model. The solution adds session model updating alongside the existing agent model update. ### Positive Aspects ■ 1. **Correct Problem Identification**: The PR correctly identifies and fixes the core issue - the session model wasn't being synchronized when the agent model changed. 2. **Follows Existing Patterns**: The usage of `us...`

Comentários: > [!NOTE] > This comment was translated by Claude. There are some minor issues:

- The rich editor's highlight overlay doesn't move with the scrollbar. You can see this by clicking on any search result and then scrolling. - The search keywords don't seem to reset correctly. First, perform a successful search, delete the keywords, then enter a non-existent word—at this point, the previous results will appear. <https://github.com/user-attachments/assets/9a8d2fcc-693e-4f9c-8fe5...>

PR #10778: fix: add array checks for knowledge and memories in citations

Autor: Pleasurecruise

Criado em: 2025-10-16T16:15:23Z

Fechado em: 2025-10-17T01:40:41Z

Comentários: ## Code Review for PR #10778 ### Summary This PR adds `Array.isArray()` checks for `knowledge` and `memories` properties in the `formatCitationsFromBlock` function to prevent runtime errors when these properties are not arrays. This fixes issue #10777 where certain LLM models (like gpt-oss) were causing render errors. ### ■ Positive Aspects 1. **Correct Fix**:

The fix directly addresses the root cause identified in the error logs (`block.knowledge.map is not a function`). 2. **Defensive Prog...

PR #10096: feat: agents implemention
Autor: vaayne
Criado em: 2025-09-11T02:01:02Z
Fechado em: 2025-10-09T02:07:18Z
Comentários: ## Code Review Feedback Thanks for implementing the agent types! Here's my feedback on the PR: ### ■ Positive Aspects 1. **Clear Type Definitions**: The interfaces are well-structured and follow TypeScript best practices 2. **Good Documentation**: JSDoc comments effectively explain the purpose of each entity 3. **Consistent Naming**: Follows the existing `Entity` suffix pattern seen in the codebase 4. **Extensible Design**: The `configuration` field allows for flexible agent settings ##...

PR #10556: feat: Add long text paste as attachment to prevent input lag / feat:

[REDACTED]

Autor: Okysu

Criado em: 2025-10-07T11:22:53Z

Fechado em: 2025-10-07T12:54:12Z

Comentários: > [!NOTE] > This comment was translated by Claude. ### Some additional notes Many modern LLMs now support context windows of 128K tokens or even larger. However, due to the inherent rendering performance limitations of browser input fields, pasting text over 100,000 characters can still cause significant UI lag. This PR sets the maximum threshold to 20,000 characters, based on the observation that most code snippets or single files do not exceed this length. The default value of 8,000 s...

PR #10548: feat: expand clickable area of topic in-place renaming

Autor: EurFelux

Criado em: 2025-10-06T15:04:03Z

Fechado em: 2025-10-07T06:24:29Z

Comentários: ## Code Review - PR #10548 ### Summary This PR successfully addresses issue #10546 by expanding the clickable area for topic in-place renaming. The change moves the onDoubleClick handler from the TopicName component to the parent TopicListItem div, improving user experience especially when topic names are short or when topic time is displayed. ### Positive Aspects 1. UX Improvement: The change directly addresses the usability concern - users can now double-click anywhere on the topic item to ...

Comentários: ## Code Review Thank you for this PR! I've reviewed the changes and here's my feedback: ### ■ What the PR does well 1. **Fixes a clear UI issue**: The PR correctly addresses the formatting problem where release notes were displaying incorrectly (all aligned to the left instead of proper list formatting). 2. **Simple and focused change**: The fix is minimal and targeted - adding the `markdown` class to `UpdateNotesWrapper` to ensure proper markdown rendering. 3. **Consistent with c...

PR #10349: fix(translate): remove unused effect for clearing translation contenton mount

Autor: beyondkmp

Criado em: 2025-09-25T03:10:53Z

Fechado em: 2025-09-25T05:44:17Z

Comentários: ## Code Review for PR #10349 Thank you for this PR that improves the user experience of the translation page by preserving input content across page navigation. Here's my detailed review: ### ■ **Strengths** - **Excellent UX improvement**: This change addresses a real user pain point where translation input would be lost when navigating away to copy text from other pages - **Clean implementation**: Simply removing the problematic `useEffect` hook is the correct approach since the state is...

PR #10338: ci(workflow): only trigger PR CI on non-draft PRs

Autor: EurFelux

Criado em: 2025-09-24T11:45:48Z

Fechado em: 2025-09-25T05:28:52Z

Comentários: ## ■ Code Review ### Summary This PR adds conditions to the PR CI workflow to only run on non-draft pull requests and specific event types. While the change is functional, there are some important considerations to address. ### Issues Found ##### ■ Critical: Incorrect Condition Logic The condition `if: github.event.pull_request.draft == false` won't work as intended for all event types. When a PR is initially opened as non-draft, `github.event.pull_request.draft` will be `false`, but for ...

PR #10322: Fix/seed think

Autor: DeJeune

Criado em: 2025-09-23T12:11:23Z

Fechado em: 2025-09-25T02:55:31Z

Comentários: ## Code Review for PR #10322: Fix/seed think Thank you for this PR! I've reviewed the changes for adding support for the seed-oss model's reasoning functionality. Here's my feedback: ### ■ **Strengths** 1. **Consistent Pattern Implementation**: The changes follow the existing patterns for reasoning model support, maintaining consistency with how other models (gpt-oss, gemini) are handled. 2. **Clean Integration**: The seed-oss model integration is properly added across all rel...

PR #10319: Show loading icon when chat is in streaming

Autor: jnhyperion

Criado em: 2025-09-23T10:48:32Z

Fechado em: 2025-09-24T15:27:07Z

Comentários: I think the spinner isn't very suitable as a logo during generation; it's more appropriate as a loading indicator. You can refer to the [wave and dots styles here](<https://www.heroui.com/docs/components/spinner#variants>)—they would be better. | update to dots style: | Seems pretty good! ■ The only issue right now is that the format check hasn't passed yet.

PR #10337: refactor(SelectModelPopup): replace HStack with Flex component

Autor: EurFelux

Criado em: 2025-09-24T11:37:46Z

Fechado em: 2025-09-24T12:10:13Z

Comentários: ## Code Review for PR #10337 ### Summary This PR refactors the SelectModelPopup component to replace the custom HStack component with the Flex component from @cherrystudio/ui. ### ■ Positive Aspects 1. **Migration to HeroUI**: This change aligns with the project's goal to migrate from antd & styled-components to HeroUI, as documented in CLAUDE.md. 2. **Consistency**: Using Flex from @cherrystudio/ui promotes consistency across the codebase rather than having custom layout components...
